Drives like an SUV!™®

210 Chevrolet Models Owner's Manual

Including
Limited Warranty Information

WARNINGS AND CAUTIONS

This manual contains **WARNINGS** against operating procedures which could result in an accident or bodily injury.

The manual also contains **CAUTIONS** against procedures which could result in damage to your vehicle.

If you do not read the entire manual you may miss important information. Observe all Warnings & Cautions.

WARNINGS:

SEAT BELTS:

Only forward facing seats equipped with factory installed seat belts are to be occupied while the vehicle is in motion. All passengers must be seated in these seats only, with the seat belts fastened while the vehicle is in motion.

TV:

The flat screen TV should not be stored inside the Roadtrek in temperatures below -4°F (-20°C) to reduce the chance of damage from the cold. The operating temperature of the monitor is recommended between 50°F and 104°F (10°C and 40°C) with a humidity range of 10% to 80%, non condensing.

If your vehicle is equipped with an optional flat screen TV, the TV must be off and in the stored position during travel.

LPG:

L.P.G. tanks shall not be placed or stored inside your vehicle. L.P.G. tanks are equipped with safety devices which relieve excessive pressure by discharging gas to the atmosphere.

To reduce the danger of fire or explosion do not store gasoline or other flammable liquids inside your vehicle. Ensure you purchase L.P.G. From a reputable L.P.G. facility. Contaminated L.P.G. is common cause of system failure.

Do not refuel the L.P.G. tank to more than 80% of its capacity.

The L.P.G. tank valve must be closed and ALL PILOT LIGHTS, APPLIANCES, AND THEIR IGNITERS (see Operating Instructions) SHALL BE TURNED OFF during refueling of motor fuel tank and/or the L.P.G. tank. Only qualified personnel should refuel your L.P.G. tank.

APPLIANCES:

It is not safe to use cooking appliances for space heating purposes due to the danger of asphyxiation.

The L.P.G. Stove needs fresh air for its safe operation.

Portable fuel burning equipment, including wood or charcoal grills and stoves, should not be used inside your vehicle. Use of this type of equipment inside your vehicle may cause fire or asphyxiation.

L.P.G. LEAK DETECTOR:

Do not block air circulation in the area where the L.P.G. Leak Detector is located.

Battery disconnect switch must be in the "ON" position for the L.P.G. detector to function.

CARBON MONOXIDE LEAK DETECTOR:

Do not block air circulation in the area where the carbon monoxide leak detector is located.

Battery disconnect switch must be in the "ON" position for the Carbon Monoxide Leak Detector to function.

110 VOLT ELECTRICAL SERVICING:

Prior to servicing the 110 volt Galley GFCI & Audio/Video cabinet interior receptacles, unplug the output lead from the power inverter.

EXTERIOR ACCESS DOORS:

Ensure power cord and city water line are disconnected and in their stored positions before vehicle is put in motion.

CAUTIONS:

CLOVERLEAF DINING TABLE:

Cloverleaf dining table is heavy, lift while bending knees.

EXTRA COUNTER SPACE:

Make sure the stove is off and has cooled prior to lowering the stove cover.

TV:

When the vehicle is in motion it is recommended that the TV be "OFF" and in the stored position. The thumb tab should be in place to secure the TV in the stored position.

The flat screen TV (option TF) should not be stored inside the Roadtrek in temperatures below -4°F (-20°C). The operating temperature of the monitor is recommended between 50°F & 104°F (10°C – 40°C) with a humidity range of 10%-80%, non condensing.

To remove the T/V, remove the four mounting bolts on the back of the T/V mounting bracket and remove the RCA cables, power supply cable and antenna cable.

AUXILIARY BATTERY:

Battery acid can burn skin and clothing. Protective eye wear and gloves should be worn when handling batteries.

REPLACING THE AUXILIARY BATTERY:

Ensure that the inverter is disconnected prior to disconnecting the auxiliary battery.

GENERATOR:

When launching a boat, using your Roadtrek, it is important to know that the generator must not be submerged in water.

WASTE WATER STORAGE AND DUMPING SYSTEM:

Ensure that both the black and gray water gate valves are closed (inward position) before using the waste water system.

Under moderate subfreezing conditions, antifreeze is required in the exterior fresh water tank, black and gray waste water tanks. Antifreeze should be used at a 50% water and 50% antifreeze ratio.

THE WARNINGS AND CAUTIONS IN THE QUICK REFERENCE ARE AN OVERVIEW AND THERE ARE MORE NOTES AND INSTRUCTIONS WITHIN THIS MANUAL.

OBTAINING MOTORHOME SERVICE

The solution to all your Roadtrek concerns starts with your Roadtrek Dealer

A WORD TO ROADTREK OWNERS...

This manual has been prepared to acquaint you with the operation, maintenance and warranties of your new **Roadtrek Motorhome Van**. Your vehicle has been designed, engineered and manufactured to provide you with the utmost in pleasure, dependability and quality. It is important that you read the contents of this manual, that of the Chevrolet chassis and those of other components, and follow the instructions and recommendations contained in each to help assure the most enjoyable and trouble free operation of your vehicle.

We would like to take this opportunity to thank you for selecting a **Roadtrek** product and assure you of our continuing commitment to your recreational vehicle pleasure, safety and satisfaction.

INTRODUCTION

This manual has been written to provide you with the information required to properly operate and maintain your new Roadtrek. After reading this manual, be sure to keep it in your vehicle as a reference. Your **Roadtrek** dealer will be glad to answer any further questions about the operation of your vehicle.

IMPORTANT

Every reasonable precaution has been undertaken in the preparation of this manual resulting in the utmost accuracy possible at the time of publication. However, due to the continuing improvement and refinement of our products and normal changes in information and procedures, Home & Park shall assume no responsibility whatsoever for errors or omissions in the manual's contents.

Further, Home & Park shall not be held liable or assume any obligations or responsibilities whatsoever for any loss, damage or injury directly or indirectly caused by, arising or resulting from, or as a consequence of the use or nonuse of the information contained herein or the operation or non-operation of any items mentioned herein. And finally, Home & Park shall be indemnified and saved harmless from all losses, expenses, claims and demands whatsoever.

2005 STANDARD AND OPTIONAL AUTOMOTIVE FEATURES

2005 STANDARD AND OPTIONAL AUTOMOTIVE FEATURES	Roadtrek 210 models on Chevrolet 3500 Extended Van
Air bag - driver & passenger	standard with passenger on/off switch
Alternator	145 amp.
Axle - rear - standard	4.10 ratio (w/locking diff., trans. cooler)
Battery	600 amp.
Brakes - anti lock	four wheel disc
Cooling - transmission oil	standard - internal
Defroster - rear window	standard
Door locks	power - all doors
Doors & exits	wide side & 50/50 rear
Engine - standard	6.0 L SFI gas V8
Fuel capacity	117 L/31 US gal.
Ground effects package	optional
Mirror - interior	compass & exterior temperature
Mirrors - exterior	power - 7 1/2" x 8"
Power - standard	223 kW/300 HP
Receiver - Class IV frame mounted	standard
Running boards	aerodynamic with storage
Seats - Captain's	swiveling, reclining, power lumbar supports & dual armrests
Seats - leather	optional - Captain's & lounge seats
Sound system	premium AM/FM & CD
Tire storage - spare	rear storage area or optional Continental kit
Tires	LT245/75R16E black wall
Torque - standard engine	490 N-m/360 ft. lbs.
Towing - GCWR * - standard	7258 Kg/16000 lbs. *
Towing - tow weight ** - standard	3450 Kg/7600 lbs. **
Towing - tongue weight ***	454 Kg/1000 lbs. ***
Wheels - standard	steel - 16" - with trim
Wheels - optional	aluminum - 16" - with steel spare
Window operation	power - front doors only
Window tint	tinted - all
Wiring harness for towing - 4 way	standard
Wiring harness for towing - 7 way	optional (in addition to 4 way)

* Gross Combination Weight Rating (GCWR) includes total weight of vehicle, equipment, fuel, water, LP gas, cargo, driver and passengers.

** Maximum towable weight with driver and minimal fuel only. This weight reduced by weight of optional equipment, fuel, water, LP gas, cargo and/or passengers.

*** A weight distributing hitch is required for tongue weights over 200 Kg/400 lbs.

2005 EXTERIOR DIMENSIONS

Length	6680 mm/21' 11" *
Height - overall	2590 mm/8' 6"
Width - overall (w/o mirrors)	2240 mm/7' 4"
Wheel base	3940 mm/155"
Unloaded vehicle weight ** (no opt.)	3750 Kg/8200 lbs.
Gross vehicle weight rating	4355 Kg/9600 lbs.

* Add 250 mm/10" if equipped with optional Continental spare tire kit.

** Includes weight of base vehicle and fuel only. Does not include weight of optional equipment, water, LP gas, cargo and/or passengers.

2005 INTERIOR DIMENSIONS

Standing height	1880 mm/74"
Queen bed length	2030 mm/80"
Queen bed width	1520 mm/60"
Single bed length - front	1660 mm/65" right
Single bed width - front	560 mm/22" (maximum)
King bed length	1930 mm/76" (maximum)
King bed width	2030 mm/80" (maximum)
Twin bed length - rear	1930 mm/76" left, 1830 mm/72" right
Twin bed width - rear	760 mm/30"
Water tank - fresh	10 US gal interior/20 US gal exterior
Water tank - grey	85 L/23 US gal.
Water tank - black	40 L/10 US gal.

2005 STANDARD MOTORHOME FEATURES

2005 STANDARD MOTORHOME FEATURES	Roadtrek 210 models on Chevrolet 3500 Extended Van
Air conditioner	110V recessed, 12000 BTU
Aisle	32"/810 mm wide
Battery - auxiliary - 12V	lead acid deep cycle, 95 amp-hrs.
Battery storage - auxiliary	slide-out tray below floor
Beds - dual density foam	130 mm/5"
Cabinet - audio/video & storage	standard
Carpet	40 oz. 100% Dupont nylon
Connection - auxiliary	LPG for BBQ w/quick disconnect
Connection - external - 110V	standard w/detachable power cord
Connection - external - TV cable	standard
Connection - external - water	standard with quick disconnect
Counter top	molded fiberglass w/solid surface
Detectors	smoke, LP gas & CO
Faucet - galley	single lever
Floor - lowered	2025 mm x 890 mm x 50 mm 80" x 35" x 2", no step over frame
Furnace - 'Suburban'	LP gas automatic, 16000 BTU for 'Onan'
Generator ready package	'Dometic' with ducts to rear bed
Heat pump (A/C & heater)	toast & bake, 28L/1.0 cu. ft., 1800 W
Microwave oven - 110V	water & LP gas levels, battery charge & battery disconnect
Monitor panel	110/12V electronic with all 12V outputs filtered, 45 amp.
Distribution panel	12/110V, 600 W
Power inverter with charger	with trifold doors, patented
Privacy area	with exhaust fan & light
Range hood - 12V	12V/110V/LP gas, 4.0 cu.ft.
Refrigerator - 'Dometic'	low profile power w/thermostat
Roof vent - 'FanTastic' - 12V	12V macerator sewage pump
Sewage disposal system	stand-up in aisle
Shower	molded into counter w/flush cover
Sink	across the rear with trunk
Storage area	3 drawers below floor
Storage compartments - exterior	68 cu.ft., 86 w/options
Storage capacity - standard	LP gas recessed w/flush cover
Stove - two burner	32" x 32" open, 20" x 20" closed
Table - dining - cloverleaf	38 L/10 US gal./45 lbs.
Tank - LP gas	marine with foot pedal flush
Toilet - 'Thetford'	built-in
TV antenna - 'Hide-A-Tenna'	front & rear door posts to reduce clutter & prevent tampering w/supply
Water fill - fresh - location	110V/LP gas with bypass, 23L/6 US gal., 12000 BTU
Water heater - 'Suburban'	12V with 'Shurflo' water pump (see Interior Dimensions)
Water system - on demand	frameless awning type
Water tank capacities	3 frameless with removable shades
Windows	
Windows - roof	

2005 MOTORHOME OPTIONS

Armoire - with removable & adjustable shelves & drawers	optional, permanently replaces right lounge seat
Awning - box	optional, 3500 mm/11'6"
Battery - second auxiliary	optional, two lead acid deep cycle 6V, 220 total amp-hrs. (repl. 12V)
DVD player	optional, with remote
Generator - 'Onan MicroLite'	optional, remote-start, 2.8 kW
Lounge - L-shaped at rear	optional
Satellite receiver	optional
Screen package	optional for side van door windows and side & rear door openings
Seat belts for 2 in rear	optional
TV - flat screen	optional, 15" (600 W inverter std.)
Video cassette recorder	optional

APPLIANCE & ACCESSORY MANUFACTURER'S LOG

Appliance	Manufacturer	Model
Awning	Fiamma	F45

CAPTAIN'S SEATS:

To recline, pull up the recline control lever below the inboard armrest and lean back.

To slide, pull up on the slide bar located on the front of the seat and slide the seat either forward or back, (see Picture B-P1a).

To swivel the seats from a forward facing position to a rearward facing position pull the swivel lever up, (see Picture B-P1).

Important Note: Before swiveling the seat, you must be aware of the following:

1. Ensure that the back of the seat is reclined forward, as far as the recline control allows.
2. Slide the seat forward but not so far as to lose clearance of the engine cover. Pull up on slide bar, (see Picture B-P1A).
3. Put the tilt steering wheel in the most downward position.
4. The swivel lever is located on the door side of the seat and locks the seat in a forward facing position. To release pull the swivel lever up and the seat freely swivels, (see location on Picture B-P1).
5. Swivel the seat to the desired position, (see Picture B-P2).

Picture B-P1: View of front captain's seat showing the location of the swivel lever.

Picture B-P1A: View of the front of the Captain's seat, showing the location of the slide bar.

Picture B-P2: Captain seats swiveled towards the rear of the Motorhome.

SEAT BELT USAGE:

Only forward facing seats equipped with factory installed seat belts are to be occupied while the vehicle is in motion. All passengers must be seated in these seats only with the seat belts fastened while the vehicle is in motion.

FRONT LOUNGE SEATS:

To convert the lounge seat into a single bed:

1. Swivel the passenger captain's seat 90 degrees clockwise so that the backrest is toward the center aisle. Be sure all armrests are in an upright position, (see Picture B-P15).
2. Slide out the drawer under the passenger lounge seat and fully extend the drawer forward until it touches the raised platform, (see Picture B-P15). Raise the support block located at the front of the drawer, (see Picture B-P16).
3. Lift the lounge seat back rest cushion upward. Remove from its metal support and place it flat on top of the drawer, with the tapered end forward, (see Picture B-P17).

Picture B-P14: Swiveled front captain seat.

Picture B-P15: Extended drawer.

Picture B-P16: Raised support.

Picture B-P17: Front lounge bed.

To convert back to a lounge seat, perform these steps in reverse order.

The lounge and optional 2 rear passenger seats are designed to carry passengers while your vehicle is in motion and are equipped with seat belts installed for their protection. All passengers must be seated in the front captain's seats, lounge seats and optional 2 rear passenger seats, facing forward with seat belts fastened while vehicle is in motion. All other seats are not to be occupied while vehicle is in motion. The lap belts must be worn across the hips and not across the abdomen. Passengers must sit well back in the seat and in an upright position.

EXTERIOR ACCESS DOORS:
DRIVER SIDE ACCESS DOORS:

Behind the lockable middle access door, (see Pictures B-P27, 28 and 29) the following are found:

1. Sewage hose.
2. Grey water gate valve handle.
3. Black water gate valve handle.
4. Storage compartment.
5. Exterior fresh water drain valve.

Behind the driver side lockable rear access door, (see Picture B-P30) the following are found:

1. City water connection, (integrated at the side behind the rear access door).
2. City water by-pass valve.
3. Exterior shower faucet's.
4. Cable TV connection.
5. External 110V power connection.

Warning: Before driving ensure the shore power cord and city water line are disconnected.

Picture B-P27: Black water, grey water valves and sewage hose locations.

Picture B-P28: Front access door showing storage.

Picture B-P29: Exterior fresh water tank drain valve.

Picture B-P30: External connections.

L.P.G. (Liquid Propane Gas) ACCESS DOOR:

Behind the **L.P.G. access door**, (integrated into the rear bumper, covered with a black plate, see Picture B-P31), the following are found:

1. L.P.G. fill valve.
2. L.P.G. tank shut off valve.
3. Portable barbecue connection.

Picture B-P31: L.P.G. access door.

PASSENGER SIDE ACCESS DOORS:

Behind the access door in front of the rear passenger tire, (see Picture B-P32) the slide out tray with auxiliary battery(s) is found.

Behind the passenger side rear lockable access door, (see Picture B-P33), a slide out storage area is found.

Picture B-P32: Slide out battery drawer, dual battery option shown.

Picture B-P33: Slide out storage tray.

REAR STORAGE UNDER THE BED:

Awning crank/support storage, (see Picture B-P32A).

Rear storage trunk, (see Picture B-P33A).

Picture B-P32A: Awning crank and support storage.

Picture B-P33A: Rear storage trunk.

210 Chevrolet

Your vehicle is equipped with an L.P.G. (Liquid Propane Gas) system which, when properly handled and maintained, will provide trouble and worry free operation of your L.P.G fueled appliances.

L.P.G. fuel is stored in a liquid state under extremely high pressure. As fuel is used, L.P.G. passes from the top of the tank through the regulator into the gas lines and eventually to the appliances.

Although the entire system has undergone extensive factory and dealer testing for leaks, the system's connections and fittings are subjected to road vibrations and therefore **should be checked annually for possible leaks.**

L.P.G. fuel is extremely flammable, colourless, heavier than air and smells like garlic or rotten eggs.

IF YOU SMELL GAS, extinguish any open flames, pilot lights and smoking materials immediately. Do not touch any electrical switches. Leave vehicle, shut off the gas supply at the tank valve and open doors and windows to provide maximum ventilation. Leave the area until the odor clears. Have the system checked and the leak corrected before use.

L.P.G. fuel tank valve must be open to operate gas fueled appliances.

WARNING: L.P.G. tanks shall not be placed or stored inside your vehicle. L.P.G. tanks are equipped with safety devices which relieve excessive pressure by discharging gas to the atmosphere.

WARNING: To reduce the danger of fire or explosion do not store gasoline or other flammable liquids inside your vehicle.

WARNING: Ensure you purchase L.P.G. from a reputable L.P.G. facility. Contaminated L.P.G. is a common cause of system failure.

WARNING: Follow all recommended maintenance schedules.

L.P.G. TANK:

To open and close the tank use the manual tank shutoff valve located on the tank, accessible from behind the rear bumper.

It is recommended to close the tank shutoff valve when the vehicle is not in daily use. Further, it is recommended to close the shutoff valve when the vehicle is in travel.

The refrigerator should be operated on 12 volt when the vehicle is in travel. See refrigerator Manufacturers Owner Manual for proper 12 volt operation.

APPLIANCES:

WARNING: It is not safe to use cooking appliances for space heating purposes due to the danger of asphyxiation.

WARNING: The L.P.G. stove needs fresh air for its safe operation.

Because the amount of air supply is limited by the size of your vehicle, before operating the L.P.G. stove, open the overhead vent or a window and then turn on the range hood for increased air circulation, (see Floor Plan & Appliance Location). Proper ventilation when using the L.P.G. stove will reduce the dangers of asphyxiation.

WARNING: Portable fuel burning equipment, including wood and charcoal grills and stoves, should not be used inside your vehicle. Use of this equipment inside your vehicle may cause fire or asphyxiation.

See appropriate component Manufacturer's Owner's Manuals for operating instructions.

REFUELING PROCEDURES:

WARNING: Do not refuel the L.P.G. tank to more than 80% of its capacity.

A properly refueled L.P.G. tank will hold approximately 80% of its volume in a liquid state. Over fueling of the L.P.G. tank can result in uncontrolled gas flow which can cause fire or explosion.

WARNING: The tank valve must be closed and **ALL PILOT LIGHTS, APPLIANCES, AND THEIR IGNITERS, (see Operating Instructions) SHALL BE TURNED OFF** during refueling of motor fuel tank and / or the L.P.G. tank. Only qualified personnel should refuel your L.P.G. tank.

REGULATOR:

The L.P.G. regulator is located adjacent to the L.P.G. tank.

This regulator has been installed under a protective cover to keep out debris, with the vent facing downward.

L.P.G. LEAK DETECTOR:

Your vehicle has been equipped with a L.P.G. leak detection device for your protection, (see Picture F-P1, Popular model, see Picture F-P1A, Versatile model).

See "Floor Plan & Appliance Location" for location of the L.P.G. leak detector location.

Be sure the detector is operating while using your vehicle. **Do not block air circulation in the area where the L.P.G. leak detector is located.**

See Manufacturer's Owner's Manual for other operating instructions.

WARNING: Battery disconnect switch must be in the "ON" position for detector operation.

Picture F-P1:
L.P.G. leak detector,
Popular model.

Picture F-P1A:
L.P.G. leak detector,
Versatile model.

CARBON MONOXIDE LEAK DETECTOR:

Your vehicle is equipped with a carbon monoxide (CO) leak detection device for your protection, (see Picture F-P2).

See "Floor Plan & Appliance Location" for location of the carbon monoxide gas leak detector location.

Be sure the detector is operating while using your vehicle. Do not block air circulation in the area where the carbon monoxide leak detector is located.

See Manufacturer's Owner's Manual for other operating instructions.

WARNING: Battery disconnect switch must be in the "ON" position for detector operation.

Picture F-P2: Carbon monoxide leak detector.

SMOKE DETECTOR:

Your vehicle is equipped with a smoke detection device for your protection, (see Picture F-P3, Popular model, see Picture F-P3A, Versatile model).

See "Floor Plan & Appliance Location" for the smoke detector location.

This device should be tested after each time your vehicle has been in storage, before each use, and at least once each week during your vehicle's use.

NOTE: Upon delivery of your vehicle from the factory, the detector is inoperative because the battery is reversed to prevent drainage. Before operation, reverse the battery to the proper position and test the operation of the detector.

Be sure the detector is operating while using your vehicle. Do not block air circulation in the area where the smoke detector is located.

See Manufacturer's Owner's Manual for operating instructions.

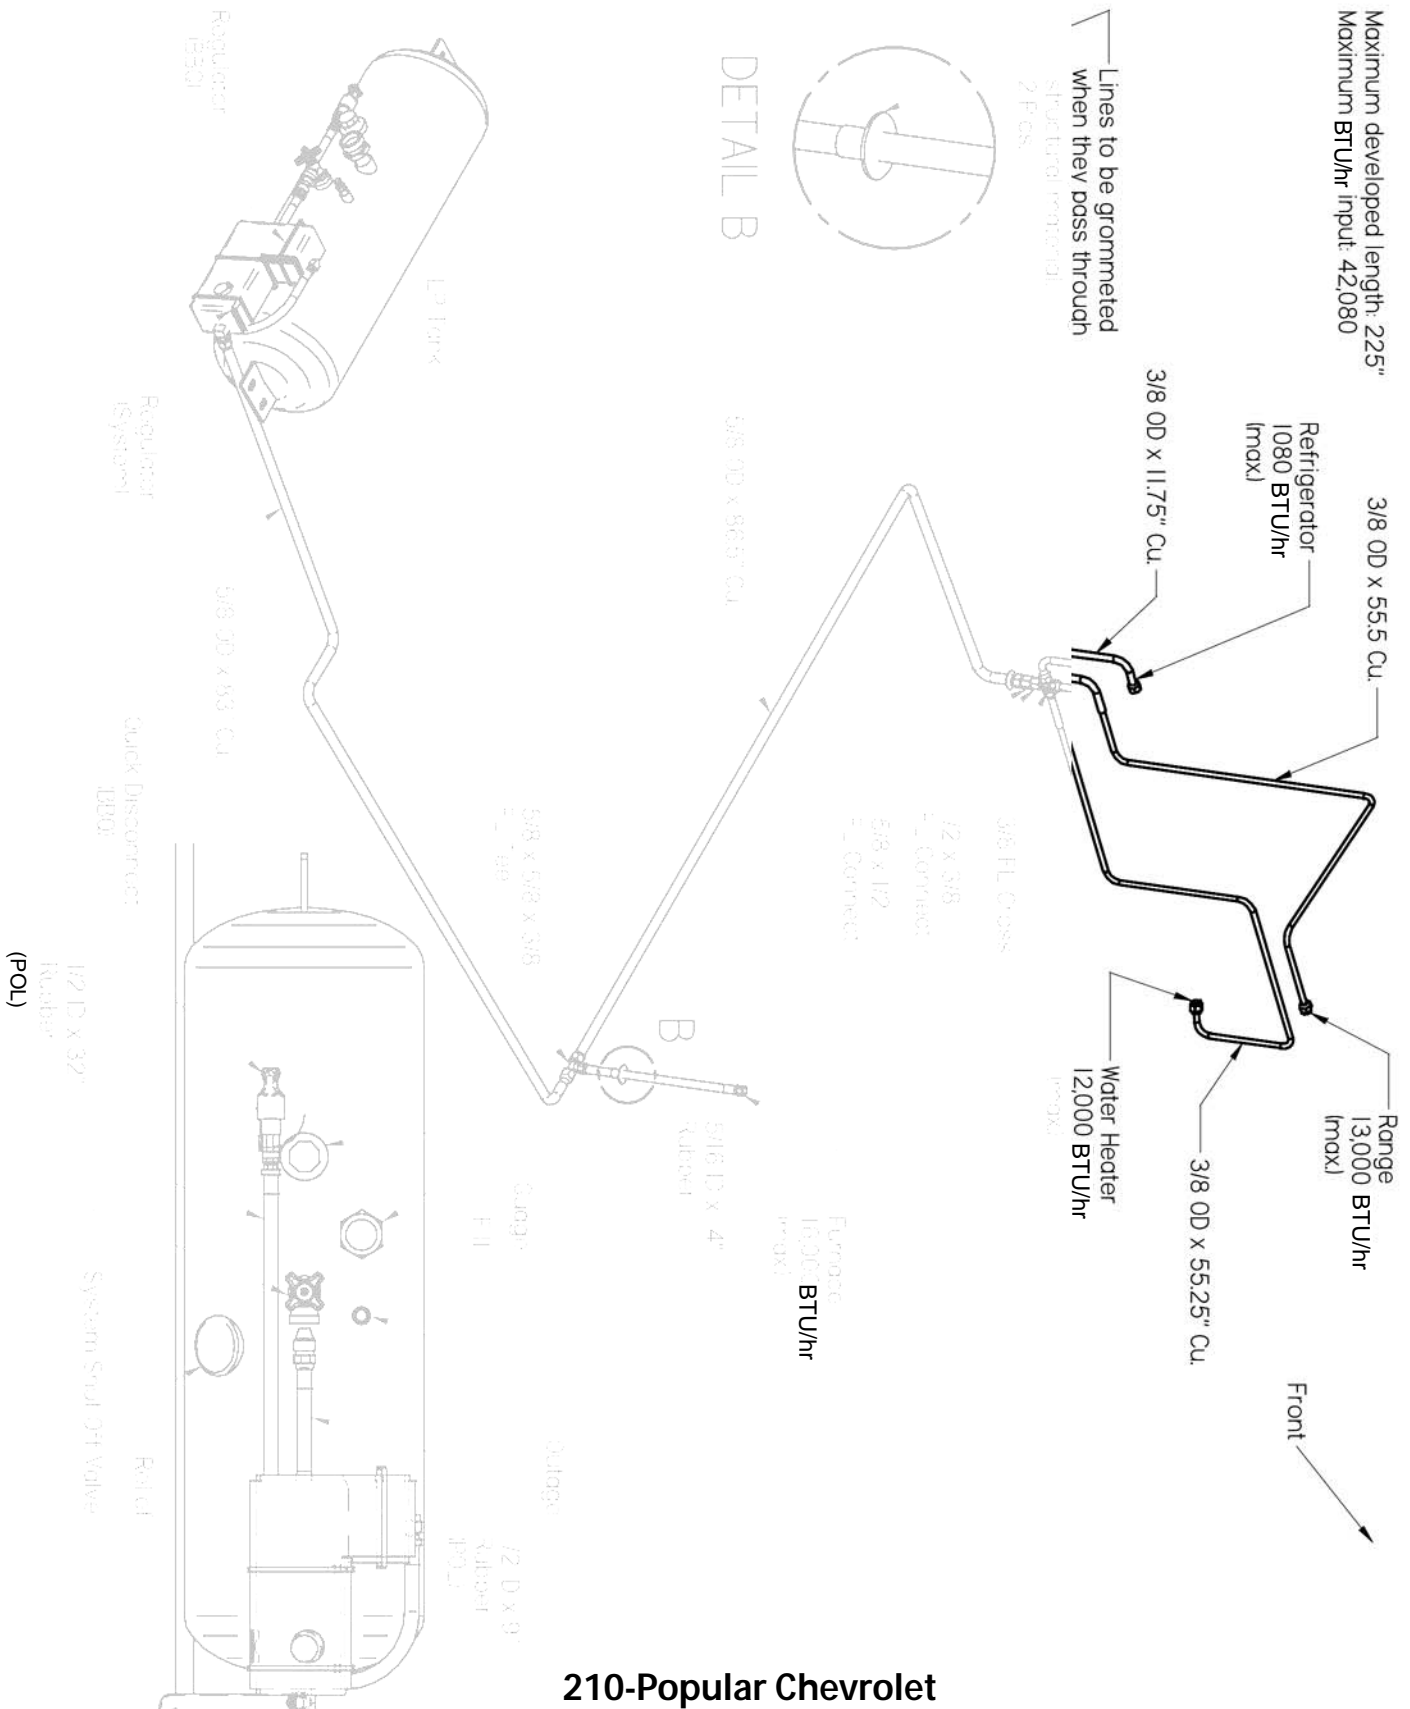

NOTE: Cleaning products may contaminate safety detectors. Detectors should be covered when using cleaning chemicals on the vehicles interior.

210-Popular Chevrolet

Maximum developed length: 272.3"
Maximum Btu/hr input: 42,080

210-Versatile Chevrolet

WINTER MODE VALVE POSITIONS:

Tank selector valve must be in the interior tank position, (see Picture G-P1).

WINTER USE: (Moderate Subfreezing Conditions, -10°C (14°F)):

The dual tank system allows you to use the fresh water system under moderate subfreezing conditions by allowing you to isolate and drain the exterior fresh water tank.

- During winter use
- Use gravity fill for interior tank only.
 - No outdoor shower.
 - Waste water tanks are unprotected from freezing unless charged with antifreeze.
 - Interior temp must be maintained above 65°F(18°C) .
 - Fridge must be turned ON.
 - Exterior fresh tank must be drained.
 - Exterior shower and city fill must be drained.

To prepare your motorhomes fresh water system for winter use you must do the following:

1. Ensure you first turn off the water pump, (switch is found on the monitor panel) before isolating and draining the exterior fresh water tank.
2. Switch tank selector valve to interior tank position, (see Picture G-P1).
3. Drain exterior fresh water tank by opening exterior drain valve, (see Picture B-P30A on page B-10).

SUMMER USE VALVE POSITION:

1. Tank selector valve must be in the exterior tank position, (see Picture G-P2).

SUMMER USE:

1. The dual tank system requires you to switch from the interior tank to the exterior tank position. This will allow you to utilize the full capacity of both fresh water holding tanks.
2. To utilize the interior tank and the exterior tank at the same time, you must open the interior fresh water tank drain and position the supply selector valve to the exterior or summer position, (see Picture G-P6 on page G3).

Picture G-P1: Selector valve position for supply from the interior fresh water tank.

Picture G-P2: Selector valve position for supply from the exterior fresh water tank.

Your Roadtrek is equipped with a water heater by-pass valve. When it is in summer mode, all three valves will face the aisle, (see Picture G-P3). In winter mode, the water line valve is open and the valves at the water heater are closed, (see Picture G-P4).

NOTE: When the water system is operating in the winter mode, only the interior fresh water tank is to be used.

Picture G-P3: Summer mode valve positions.

Picture G-P4: Winter mode valve positions.

To drain the exterior fresh water tank you must open exterior drain valve at the low point drain located below the drivers side front storage drawer compartment, (see Picture G-P5).

Picture G-P5: Location of the exterior freshwater tank drain.

Picture G-P6: Interior tank drain valve in open position.

Picture G-P7: Interior tank drain valve in closed position.

TO DE-WINTERIZE:

Repeat the steps in reverse order.

NOTE: By using antifreeze in the black and grey waste water tanks, the waste water system can be used in moderate subfreezing conditions.

Although the waste and fresh water systems have been designed for use in moderate subfreezing conditions, Home & Park Motorhomes makes no warranty what so ever for damage to the water systems as a result of freezing.

To prevent interior water lines from freezing, it is recommended that the interior temperature be maintained at +65°F (18°C) and the refrigerator left running.

FRESH WATER TANKS:

One tank is located in the vehicle's interior, the other tank is located on the vehicle's exterior. The purpose of the dual tank system is to provide a separate fresh water system that can be used in moderate sub freezing conditions.

The system can only function properly in either one of two modes. Summer use or winter use. All procedures to change operation modes must be followed for proper operation.

Your vehicle is equipped with a water system for either completely self contained or fully dependent use. It is not equipped with a pressure regulator to compensate for varying water pressure levels.

During self contained use, caution should be taken so as to minimize water consumption. For example, water consumption can be reduced while showering if you turn off the shower between wetting down and rinsing off.

To avoid damage due to road vibrations, be sure not to store heavy or sharp objects where they may come into contact with either the water lines or water pump. Also, allow sufficient room around the pump for proper operation.

FILLING THE INTERIOR FRESH WATER TANK:

The interior fresh water tank can be filled through the gravity fill located on the passenger side of the rear door opening, (see Picture G-P8). To fill the interior tank:

1. Open the rear passenger door.
2. Open the gravity fill cover by removing the orange plug, (see Picture G-P8).
3. Insert the hose and fill the tank using moderate pressure, (excessive pressure will result in a back flow of water).
4. When the tank is full, water will overflow back through the gravity fill hole.
5. Overfilled tanks will spill out through tank vents. This is evidenced by water dripping from the rear passenger side corner of van.

Picture G-P8 : The gravity fill for the interior fresh water tank, (located on passenger side rear door post).

FILLING THE EXTERIOR FRESH WATER TANK (All Models):

1. Open the front driver side door.
2. Open the gravity fill cover by removing the orange plug, (see Picture G-P9).
3. Insert the hose and fill the tank using moderate pressure, (excessive pressure will result in a back flow of water).
4. When the tank is full, water will overflow back through the gravity fill hole.
5. Overfilled tanks will spill out through tank vents. This is evidenced by water dripping from the underside of the van.

Picture G-P9 : The water fill for the external fresh water tank, (located at driver's side front door post).

The fresh water tanks can also be filled through the city water inlet located behind the rear lockable driver side access drawer, for location, see the Daily Living section. The use of the city fill is not possible when in the winter operation mode.

To fill the tank:

1. Prior to using city fill, ensure water system is in summer use mode, (see Picture G-P2 on page G-1). Connect a hose to the city water inlet connection, (see Picture G-P10).
2. To fill the exterior fresh water tank, open the city water tank fill shut off valve, (see Picture G-P11).
3. Open the water source moderately.
4. When the tank is full, water will overflow in the same manner as when using the gravity fill, (see previous page).
5. To fill the interior fresh water tank, ensure the water system is in winter mode, (see Picture G-P1 on page G-1). Repeat steps 2-4.
6. Close the city water tank fill shut off valve, (see Picture G-P5).

Picture G-P10: Location of the city water inlet connection.

Picture G-P11: Open position of the city water tank fill valve.

Picture G-P12: Closed position of the city water tank fill valve.

CITY WATER CONNECTION:

NOTE: City water connection can only be used in summer operation mode.

The city water inlet connection is located in the small compartment behind the large lockable driver side storage compartment, (see Picture G-P10). To connect the water system to an outside source:

1. Ensure that the water pump is turned off.
2. Close the city water tank fill valve by turning the handle to the vertical position, (see Picture G-P12).
3. Be sure that all interior faucet's are closed to prevent spillage.
4. Open the city water source slowly to prevent excessive water force inside your vehicle. To protect your system from excessive pressure from water supply systems encountered in some areas, a water pressure regulator should be used. Such a regulator is not supplied with your vehicle.
5. Note that this connection by-passes the water pump and fresh water tank. Therefore, the use of these items is not necessary when connected directly to an external water source.

To disconnect the city water connection:

1. Turn off the external water source.
2. Open the sink faucet to relieve the pressure in the system, (failure to do so may result in an unexpected shower).
3. Ensure that the city water tank fill valve is closed, (see Picture G-P12).
4. Remove the hose from the city water connection, replace the cap on fill connection.

WASTE WATER STORAGE AND DUMPING SYSTEM:

Your vehicle is equipped with a waste water storage and dumping system that will provide adequate and effective storage and dumping of waste water. Your vehicle should be as level as possible to allow optimal operation of the system.

CAUTION: Ensure that both the black and grey water gate valves are closed, (inward position) before using the waste water system. This applies especially after extensive driving. Black and grey water dump valves are accessed through the driver side storage door, (see Picture G-P13).

Waste Water Tank Preparation:

Your vehicle is equipped with two waste water tanks; the grey waste water tank is for waste water from the sink and aisle shower. The black waste water tank is for sewage from the toilet. Both tanks are equipped with separate dump valves so that each may be dumped independently. Before use of either waste tank, be sure to read instructions provided by the toilet manufacturer regarding waste water chemicals. We suggest that such chemicals be used every time to minimize odours and build up of solids on water level sensors inside the tanks.

CAUTION: During winter use under moderate subfreezing conditions, (refer to page G.1-G.3) antifreeze is required in the exterior black and grey waste water tank. Antifreeze should be used at a 50-50 ratio.

Picture G-P13: Driver side storage door.

Picture G-P14: Access to sewer discharge assembly, black and grey gate valve handles.

Picture G-P15: Macerator pump located under center of vehicle.

Picture G-P16: Macerator pump switch located on driver's door post.

Picture G-P17: Sewage discharge hose storage located in driver's side storage drawer.

Picture G-P18: Sewage hose discharge valve.

Waste Water Tank Dumping:

To dump the exterior black waste water tank:

1. Turn the battery disconnect switch to the "ON" position, if not already on, (located on the monitor panel).
2. Remove sewage discharge hose from storage, (see Picture G-P17).
3. Insert the discharge outlet into the waste receptacle.
4. Open the valve on the sewage hose, (see Picture G-P18).
5. Open the black water tank valve, (see Picture G-P14).
6. Open the driver's door, press and hold the macerator pump switch until the tank is empty, (see Picture G-P16).

To dump the grey waste water tank:

1. Open grey water tank valve.
2. Repeat step 6.
3. Close all valves.
4. Return sewage hose to its storage compartment.
5. Turn battery disconnect to the "OFF" position.

NOTICE: It is recommended to always dump the black water tank first, then the grey water tank.

NOTE: If macerator should get clogged you will have to push and turn the manual macerator crank "T" handle to dislodge any debris that might be blocking the macerator, (see picture G-P15).

Waste Water Tank Flushing:

To flush the waste water tanks:

1. Ensure that both tanks are empty by checking the monitor panel.
2. Fill the black waste water tank by inserting a hose into the toilet, **(be sure to step on the flush pedal, so the flapper door stays open to prevent toilet overflow)** and the grey waste water tank using the sink.
3. Dump both tanks using the procedure outlined above.

Both waste water tanks can also be flushed using a similar procedure, but rather than filling each tank using the potable water system, they can be filled by inserting a hose directly into the sink and toilet.

OUTSIDE SHOWER:

NOTE: Outside shower can only be used in summer operation mode.

The outside shower faucet is found in the storage compartment behind the driver side rear wheel. Remove the shower hose from the storage compartment and attach to the faucet spout, (see Picture G-P19). The shower hose must be returned to the storage compartment before travel as to prevent damage to the unit.

Picture G-P19: Outside shower and shore power connection. Shower hose storage when Motorhome is parked.

POTABLE WATER SYSTEM DRAINING:

NOTE: Water system must be in summer operation mode.

To completely drain the fresh water system of all water:

1. Ensure that the water pump is off and that your vehicle is level.
2. Ensure that the interior tank valve is in the open position.
3. Drain the fresh water tank and the hot and cold fresh water system by opening the exterior fresh water drain valve at the low point drain, (see Picture G-P5 on page G-3).
4. Open all water outlets including the sink faucet, aisle shower faucet, external shower faucet, and toilet flushing pedal. The latter can be propped open or opened manually several times. This procedure allows gravity to draw any remaining water out through the tank drains.
5. Your vehicle is equipped with a water heater, follow the manufacturer's instructions for draining.
6. Open the sink faucet and turn on the water pump until water is no longer pumped.
7. Turn off the water pump.

If this procedure is followed, it is unnecessary to blow out the water system. Once the system is drained, be sure to close all taps before driving.

NOTE: Do not allow water to sit in tanks when vehicle is not in use.

POTABLE WATER SYSTEM SANITIZING:

NOTE: Water system must be in summer operation mode.

Your potable water system should be sanitized if it is new, has not been used for a period of time, or may have become contaminated.

To sanitize your system:

1. Prepare a chlorine solution using 4 L (1 gallon) of water and 60 ml (1/4 cup) of household bleach, (5% sodium hypo chlorite solution).
2. With the fresh water tank empty, (see section on Waste Water Tank Flushing), pour, (see section on Filling Fresh Water Tank) 4 L (1 gallon) of solution into the fresh water tank for each 60 L (15 gallon) of tank capacity. As an alternative, several commercial solutions are available and should be used as directed on the package.
3. Complete filling of the tank with fresh water.
4. Turn on the water pump and slowly open all faucet's to release trapped air.
5. Close faucet's and allow to stand for 3 hours then drain and flush with fresh potable water.
6. To remove excessive chlorine taste or odor which may remain, prepare a solution of 1 L (1 quart) vinegar to 20 L (5 gallons) water and pour into tank and allow solution to agitate in tank by vehicle motion, (several days if possible).
7. Drain tank and flush with fresh potable water.

WATER SYSTEM WINTERIZING:

NOTE: Water system must be in summer operation mode and repeat operations 5 and 6 with water system in winter operation mode.

To winterize your potable water system:

1. Drain the entire system including water heater, (refer to water heater manual for instructions on draining).
2. Place water heater by-pass in the by-pass position to prevent water heater from filling with antifreeze.
3. Add 8 L (2 gallons) of approved nontoxic recreational vehicle antifreeze to the interior and exterior fresh water tanks using both gravity fills.
4. Turn on the water pump.
5. Open all three faucet's until antifreeze is visible.
6. Open the toilet valve until antifreeze is visible. Refer to the water system winterizing **NOTE** above.
7. Turn off pump.
8. Remove the plug for the aisle shower drain and fill P-Trap with antifreeze

To prepare your potable water system for use:

1. Drain the antifreeze from the system.
2. Sanitize the system if desired.

210-Popular Chevrolet

210-Versatile Chevrolet

FIBERGLASS MAINTENANCE:

To maintain the original appearance and finish, your vehicle's fiberglass running boards, roof and/or body must be waxed at least annually. If deterioration, such as tarnishing or chalking, should occur, apply a mild rubbing compound and wax to restore the original appearance.

EXTERIOR WASHING:

To prevent water from entering your vehicle, avoid spraying water directly into exterior vents or grills. Use care and caution when using a power washer to prevent water leaks. Do not point power washer directly towards any door openings, body seams, vent or automotive striping.

OTHER MAINTENANCE:

For necessary maintenance of other components and appliances, see their respective manufacturer's owner's manuals for instructions.

WINTER STORAGE:

INSIDE YOUR VEHICLE:

Before winter storage:

1. Be sure to clean your vehicle thoroughly. Special emphasis should be given to the appliances, such as the refrigerator.
2. Once cleaned, leave the refrigerator door propped open with the cutting board in the freezer compartment to prevent the development of odors, (insert a box of baking soda if desired).
3. Open a window slightly allowing sufficient air circulation to avoid the development of odors, condensation and mildew.
4. To prevent sun rays from deteriorating and fading interior fabrics, cover all upholstered seats and cushions. As a further precaution, close all drapes tightly.
5. Disconnect the auxiliary battery using the disconnect switch located in the monitor panel.

OUTSIDE YOUR VEHICLE:

Before winter storage:

1. Ensure that all waste water tanks have been dumped and flushed and that the entire potable water system has been properly drained, refer to sections on Potable Water System Draining and Potable Water System Winterizing.
2. Be sure to cover the external vents to the refrigerator, exhaust fan, furnace and air conditioner with heavy plastic sheeting to prevent entry by rodents and insects.
3. To improve tire life and maintain performance, put your vehicle up on blocks. Also, cover all tires exposed to sun light to prevent deterioration from ultraviolet rays.
4. Consult your automotive owner's manual or local automotive dealer regarding steps necessary to prevent engine and chassis damage during long periods of storage in your particular region.
5. Vehicle should be parked level so that all vents and water drains can operate properly.

SPRING START UP:

After storage, reactivate your vehicle for use by reversing all the procedures that you performed to prepare it for winter storage. In addition, L.P.G. (liquid propane gas) system's connections and fittings should be checked for possible leaks and all other systems and appliances should be operated to ensure satisfactory performance.

TIRES:

See the automotive chassis manufacturer's owner's manual and documents for tire warranty and recommended inflation pressures.

CARGO CARRYING CAPACITY:

See the information labels attached to the driver door post, inside of lower galley cabinet door, and insert at the front of this manual.

OWNER MAINTENANCE CHECKS:

Listed below are vehicle maintenance checks and inspections that should be performed by the owner or qualified service technician at the indicated intervals.

Any adverse conditions should be brought to the attention of your dealer or qualified service technician for expert service advice as soon as possible.

The owner maintenance checks are generally not covered by warranties and you may be charged for labor, parts and supplies used.

WHEN YOU STOP FOR FUEL:

Extinguish all pilot lights, (e.g. refrigerator, furnace).

Check engine oil level.

Look for low or under inflated tires, the tires should be 50 P.S.I. in the front tires and 80 P.S.I. in the rear tires.

AT LEAST MONTHLY:

Check coolant level in the coolant recovery reservoir.

Check operation of all exterior lamps, including brake lamps, turn signals and hazard warning flashers.

Check tire pressure.

Run generator for 20 minutes under load to prevent carburetor damage.

AT LEAST ONCE EVERY THREE MONTHS:

Flush black water holding tank.

Flush grey water holding tank.

Add fuel stabilizer to the fuel tank.

Flush and sanitize fresh water tank.

Grease external drawer slides.

AT LEAST TWICE A YEAR:

- Check power steering fluid level.
- Check windshield washer level and wiper operation. Clean wiper blades with clean cloth dampened with washer fluid.
- Check radiator, heater and air-conditioning hose for leaks or damage.
- Check for worn tires and loose wheel lug nuts.
- Check parking brake system.
- Check head lamp alignment.
- Check lap and shoulder belts for wear and function.
- Check air pressure in spare tire.
- Inspect appliance vents to ensure they are free from dirt, insects, spider webs and/or nests.
- Inspect black and grey water tank vents.
- Clean air conditioner filter.
- Thoroughly clean and wax the roof of the van.

AT LEAST ONCE A YEAR:

- Lubricate all door hinges, locks and latches.
- Clean battery terminals, (automotive and coach).
- Have L.P.G. test completed by certified gas technician.
- Have appliances tested and cleaned.
- Wax & polish and protect exterior surfaces.

The above maintenance schedule is a recommendation only. Please refer to your Chevrolet Manual for details on the Chevrolet required maintenance schedule.

Efficient economical vehicle performance will be enhanced by utilizing this recommended maintenance. It is strongly recommended that no repairs be made without appropriate training, tools and safety equipment. This could cause bodily injury, damage to the vehicle or cause the vehicle to operate improperly.

Home & Park shall not be held liable or assume any obligations or responsibilities whatsoever for any loss, damage or injury directly or indirectly caused by, arising or resulting from, or as a consequence of the use or nonuse of the information contained herein or the operation or non-operation of any items mentioned herein. Home & Park shall be indemnified and saved from all losses, expenses, claims and demands whatsoever.

AUXILIARY BATTERY:

Your vehicle is equipped with a group 27 lead acid auxiliary battery. Dual battery option is equipped with two 6 volt deep cycle batteries. It is recommended that acid levels be checked at least once every 3 months, every 1 month under heavy usage.

See battery manufacturers maintenance recommendations.

In order to maintain the function of the slide out battery tray you must lubricate the slides and compartment bottom. Use of a general automotive grease is recommended. It is recommended that this be done every 3 months when you are checking the acid levels.

ALUMINUM WHEEL MAINTENANCE:

Never clean your wheels when they are hot either from free standing in the sun, or from normal road use.

Always clean wheels when they are cool to the touch of your hand. If you spray any type of cleaning agent, corrosive or not, they will stain a polished and chrome wheel and even some clear coated wheels. Period. No matter how expensive they are.

Clean your wheels either early in summer mornings or dusk on summer evenings. A good practice is not to clean them in direct sunlight. We are experiencing different UV and ambient temperatures, from a result of a changing ozone. This also plays havoc on tires as well.

Clean rims using mild soap and water. Some strong cleaning agents will spot polished wheels every time.

Avoid car washes if possible when your wheels are hot. This could stain the wheel.

In time, due to brake and regional temperatures in North America, the wheel's lustre will fade, so from time to time, use a premium polish wheel cleaner/polish to keep the natural polished finish.

Never use steel wool or coarse abrasive pads to clean ANY wheel. This will cause permanent damage, and will not be warranted by the wheel manufacture.

It is recommended to place Vaseline, or some type of oil based cooking grease and coat the wheels during the harsh winter and touch them up from time to time or have a set of winter wheels and tires.

LIMITED WARRANTY DEFINITIONS

Home & Park Home & Park Motorhomes (A Division of HANMAR MOTOR CORPORATION).

Dealer	Dealer or any wholesale buyer of recreational vehicles, authorized by Home & Park .
Vehicle	Any recreational vehicle manufactured by Home & Park Motorhomes .
Purchaser	Registered owner of the Vehicle and/or purchaser of the Vehicle .
Warranty Card	Home & Park Limited Warranty Registration Card specifying Purchaser of Vehicle .

All vehicles are covered by a three part limited warranty: Automotive Warranty, Appliance Warranty, and Home & Park Limited Motorhome Warranty.

HOME & PARK LIMITED WARRANTY REGISTRATION CARD

It is very important that the Dealer complete the Home & Park Limited Warranty Registration, (at the bottom of the "QualityCare" Pre-Delivery Report) on each Vehicle and fax it to Home & Park within 48 hours from the date of retail delivery. Home & Park uses the information on the Limited Warranty Registration to:

1. Notify General Motors to start the automotive (chassis) warranty in the Purchaser's name as of the date of retail delivery.
2. Maintain records for the Home & Park Limited Motorhome Warranty and for any recall notifications.

If Home & Park does not receive this information, when the Purchaser tries to have automotive warranty work done, the Purchaser, the Dealer and Home & Park will be severely inconvenienced until this information is received and processed by General Motors.

AUTOMOTIVE WARRANTY - GENERAL MOTORS (CHEVROLET CHASSIS)

The warranty currently offered by General Motors covers the manufacture of the Chevrolet chassis. See the General Motors Warranty Information booklet for details.

For Chevrolet chassis sold through **RV dealers**, Home & Park uses the information on the completed Warranty Card to notify General Motors to **restart the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery. Upon receipt of the Warranty Card, Home & Park completes and mails the appropriate forms to General Motors who in turn enter this information into their computer systems. This process can take up to 6 weeks from when the Dealer mails the Warranty Card. If warranty work is required before this process is completed and the Vehicle's V.I.N. appears on the computer, the Purchaser should ask the Chevrolet dealer to enter the Purchaser's name and address and date of retail delivery into the computer. To prove the vehicle is still under warranty, the Purchaser should show a copy of the bill of sale to the Chevrolet dealer.

If Home & Park does not receive the completed Warranty Card, when the Purchaser tries to have automotive warranty work done, the Purchaser, the Dealer and Home & Park will be inconvenienced until this information is received and processed by General Motors.

AUTOMOTIVE WARRANTY - GENERAL MOTORS (CHEVROLET CHASSIS)

For Chevrolet chassis sold through **Chevrolet dealers**, the Dealer will enter the appropriate information directly into General Motors' computer system to **restart the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery.

All automotive service, maintenance and repairs are to be performed by any Chevrolet dealer. See the General Motors Warranty Information booklet for details. Such items are not warranted by Home & Park. **Home & Park will pay for the removal and reinstallation of motorhome components necessary to perform automotive recalls and warranty** for 36 months or 36,000 miles (in US) or 60,000 Km (in Canada), which ever occurs first, from date of purchase by the first Purchaser. After this period such costs are considered to be inherent in the ownership of such a vehicle. **Home & Park will not pay for the removal and reinstallation of motorhome components necessary to perform automotive service or maintenance.** Such costs are considered to be inherent in the ownership of such a vehicle.

LIMITED WARRANTY INFORMATION

The following information must be provided when contacting the factory for warranty:

Selling Home & Park Dealer: _____

Address: _____ Phone: (____) _____

City, State/Prov: _____ Zip/Postal Code: _____

V.I.N.(last 8 digits): _____ Sales order #(Located On The Driver Door Post Label): _____

Date Of Delivery To Owner (Retail Purchaser): _____

AUTOMOTIVE CUSTOMER SERVICE & ROADSIDE ASSISTANCE NUMBERS

Chevrolet (US) customer service	800-222-1020
Chevrolet (US) roadside assistance	800-CHEV-USA (243-8872)
GM Canada customer service	800-263-3777
GM Canada roadside assistance	800-268-6800

APPLIANCE WARRANTY

The following are not warranted by Home & Park, but are covered by individual warranties offered by their respective manufacturers to which terms both Purchaser and Dealer must comply: air conditioner, electrical inverter/charger, furnace, generator, microwave oven, range hood exhaust fan, refrigerator, stove, toilet, water pump, water heater, and macerator. Home & Park makes no warranty whatsoever, regarding these items and/or such like components manufactured by others. However, Home & Park will pay for the removal and reinstallation of such components that it determines at its sole discretion are installed by Home & Park in a manner unusual to the industry. **Purchaser and/or Dealer are required to deal directly with the nearest service center for such manufactured components** and abide by the warranty policy as allowed by such component manufacturers. The name, location and phone number of some such component manufacturer's are as follows:

HOME & PARK LIMITED MOTORHOME WARRANTY:

Home & Park warrants to the Purchaser that the Vehicle is free from defects in material and workmanship on the portion manufactured by Home & Park, under normal use and service, for **four (4) years or 48,000 miles (U.S.) or 80,000 (Canadian)** whichever occurs first, from date of purchase by the first Purchaser or the date the Vehicle was first put into service (for example, as a demo or rental), whichever is earlier.

This warranty shall be fulfilled at a Home & Park Dealer or authorized Roadtrek repair facility. For in transit emergency repairs, you may choose to deal with a non-authorized RV service facility. However **all warranty repairs at non-authorized RV service facilities** must be preauthorized by Home & Park. Home & Park will, at its option, replace or repair free of charge (including related labor) any defective part, about which the Purchaser shall notify their Roadtrek Dealer within the warranty period. The obligation of Home & Park under this warranty, is expressly limited to such replacement or repair.

The provisions of this limited warranty shall not apply to the following:

1. Accident.
2. Unauthorized repairs or alterations.
3. Normal maintenance.
4. Changes made to other units manufactured after this Vehicle was manufactured.
5. Incidental damages connected with the failure of the Vehicle such as lost time, inconvenience, loss of use of the Vehicle, cost of rental cars, gasoline, telephone, travel or lodging.
6. Damages caused by environmental factors including, but not limited to, hailstorms, tornadoes, sandstorms, lightning, floods, earthquakes, airborne fallout, chemicals, tree sap, ocean spray, road hazards.
7. Vehicle that has been declared a total loss by an insurance company (demolished) or a Vehicle whose title indicates that it is designated as "salvage," "junk," or "rebuilt" or words of similar impact.
8. Exterior side storage compartments may not be moisture free. It is advised that you store items accordingly. Home & Park is not responsible for goods damaged while stored in exterior storage compartments.
9. There will be no allowance for emergency road repair, towing, labor, meals accommodations, etc. Such will not be accepted if claimed under warranty.
10. After the "QualityCare" Pre-Delivery Report is completed by the dealer, appliance adjustments, door latch adjustments, light bulbs, fuses, battery in the smoke detector and window screens are warranted for 90 days.
11. Aluminum wheels are not warranted against corrosion that is a result of road salt, sea salt, cleaning chemicals or harsh driving conditions.

HOME & PARK LIMITED MOTORHOME WARRANTY:

The provisions of this limited warranty shall not apply to deterioration due to wear and exposure beyond the following limitations:

1. For **one (1) year** or 12,000 miles (in US) or 20,000 Km (in Canada), which ever occurs first, from date of purchase by the first Purchaser for sewage hose, curtain fabric, seating fabric, carpet, cup holders, exterior stripes and decals, running board trim, and black and grey water tank valves.
2. For **two (2) years** or 24,000 miles (in US) or 40,000 Km (in Canada), which ever occurs first, from the date of purchase by the first Purchaser for leather seats.
3. For **three (3) years** or 36,000 miles (in US) or 60,000 Km (in Canada), which ever occurs first, from date of purchase by the first Purchaser for exterior painted surfaces.

Home & Park Limited Motorhome Warranty is void unless the following conditions are adhered to:

1. Warranty Card on Vehicle must be completed by the Dealer and faxed to Home & Park within 48 hours of date of retail delivery. When warranty applications are made and Warranty Card is not on file at Home & Park, reimbursement of claim will be delayed until proof of original purchase is submitted to Home & Park.
2. All warranty claims must be submitted on a Home & Park Motorhomes Warranty Claim form and properly completed including Vehicle Identification Number (V.I.N.), odometer reading and Home & Park Limited Motorhome Warranty start date (date of retail delivery).
3. **Warranty work that will exceed \$200 must first be authorized by Home & Park** before proceeding with such work. The authorization number issued by Home & Park must be noted on the warranty claim.
4. Home & Park reserves the right to inspect defective parts that have been replaced under warranty. Dealer is expected to hold selected parts for a period of not to exceed 60 days.
5. Only parts and accessories and other material, available through Home & Park are to be used in the performance of warranty service.
6. Warranty repairs performed a second time by a Dealer (due to incorrect or inadequate diagnosis, improper assembly or repair, or lack of proper testing when the original warranty repair was performed) are considered as shop comebacks and are not reimbursable. Costs of such repairs must be adsorbed by the Dealer.
7. All claims must be submitted within 30 days of the date of repair.
8. Purchasers are responsible for presenting their vehicle to a Roadtrek Dealer as soon as a problem exists. The warranty repairs should be completed in a reasonable amount of time from date of authorization.

This limited warranty is expressly in lieu of any other expressed or implied warranty, including any implied warranty of merchantability or fitness for a particular purpose and of any other obligations or liabilities on Home & Park which neither assumes nor authorizes any other person to assume for it any other liability in connection with Vehicle manufactured by it.

REPORTING SAFETY DEFECTS (U.S. ONLY)

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Home & Park.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Home & Park.

To contact NHTSA, you may call the Auto Safety Hot line toll-free at 1-800-424-9393 (or 366-0123 in Washington, DC area) or write to:

NHTSA
U.S. Department of Transportation
Washington, DC 20590

You can also obtain other information about motor vehicle safety from the Hot line.

ROADTREK AMBASSADOR POTENTIAL CUSTOMER REFERRAL PROGRAM FOR ROADTREK OWNERS:

Most Roadtrek owners spend a lot of their valuable time giving tours of their Roadtreks to numerous inquisitive people. Many of these potential customers become Roadtrek owners. To reward their efforts and encourage more "tours" by these very convincing "sales people," we will pay a \$100.00 commission and provide incentive rewards to any Roadtrek owner who refers a potential customer to us who eventually purchases a new Roadtrek.

To participate in this program, the Roadtrek owner must sign up for the Roadtrek Ambassador program by visiting www.roadtrek.com/ambassador or calling 1-888-ROADTREK (762-3873). For every potential customer that you show your Roadtrek, complete a "Potential Customer Referral Card". You will receive \$100.00 for each referral that

ROADTREK CLUB INTERNATIONAL

As a new Roadtrek owner, you are cordially invited to join our family of Roadtrek owners as members of the "Roadtrek Club International". An owners' club offers its members an opportunity to meet other people with common interests, attend enjoyable gatherings (such as group outings, sight seeing, camping, suppers, factory tours, and more!), share travel experiences, keep current on the latest information and products from the factory, and exchange ideas for improvements or solutions to problems. Annual membership dues are only US\$10. Their common bond is the that they are all Roadtrek owners. As a group, they promote fellowship and enrich their way of life.

Roadtrek Club International is an active Chapter of the Family Motor Coach Association. FMCA, the foremost organization in the world composed exclusively for motorhome owners, was founded in 1963 for the express purpose of promoting fellowship and the use of motor coaching for pleasure. Many of its 130,000 members meet and form fast friendships with fellow motorhomers and join together in Association sponsored activities that are interesting and fun.

FMCA offers benefits and services specially designed to meet the needs of motorhome owners that you can't get anywhere else. Although space does not permit listing everything available, member benefits include: free monthly subscription to the full color Family Motor Coaching magazine, minimum cost motorhome insurance, accidental death coverage, emergency road service, trip routing service, toll free 800 number message service, mail forwarding, identification emblems for your motorhome, free membership directory, anti-theft program, discount programs, national and regional conventions, caravans and tours, and year-round activities in nearly 300 chapters of FMCA for fun, fellowship and entertainment... plus much more. FMCA dues are \$35 per year plus a one time \$10 initiation fee in the first year.

Just complete the applications on the next page and mail them with your checks to the addresses shown. You'll be glad you did!
